

## SOS Children Visit to PICT...

As part of the CSR activity, PICT invited students from SOS Village to visit the terminal operations at PICT. We had given them theoretical as well as practical education on personal safety aspects, importance of housekeeping and actions in case of emergency, as this valuable sharing related to safety process will benefit them in the long run.

PICT's primary focus was to enlighten the students about basic safety education. By the efforts of QHSE Department, the kids were briefed about how to handle fire; Students actively participated in the drill organized where they were practically involved in extinguishing fire by applying fire extinguishers & fire hose.

## Go Green Activity, CSR with Employees

PICT have teamed up all its employees and arranged an event in which management has presented the small plants to all the employees so that they take this nature's gift with them and plant the same at homes. PICT has taken this initiative with an aim that employees will take plants with them and demonstrate to their families and show how **caring** improve every aspect of our work and daily lives.
